Headline #1: The shocking TRUTH about foods “fresh” from the garden!

Headline #2: I eat a healthy diet, so why do I still feel lousy?”

Headline #3: Your “healthy” diet is KILLING you!

Dear “Healthy” Friend,

What’s WRONG with you? You eat fruits and vegetables from the farmers’ market. You’re limiting your sugar and carb intake, and you eat only healthy fats. But your hair’s falling out. Your discolored nails have ridges. Maybe you’re depressed all the time...your gums bleed...you’re losing your memory...

It CAN’T be your diet, so...*why do you still feel rotten?*

Hold on to your juicer, because the alarming statistics are in: whether you shop at the farmers’ market or grow your own...**it doesn’t matter**. Those fruits and vegetables you’re so proud of are colorful mirages with little nutritional value. You’re draining your body’s vitality while downing so-called “health foods” by the plateful!

Stop the insanity and take control of your own health! Undo the devastation “health” foods have inflicted on your body. Purify your blood... boost your immune system... revitalize your energy... nourish your brain cells...and still enjoy the foods you love! [Let me explain...](#)
